Stagnant lid tectonics: Perspectives from silicate planets, dwarf planets, large moons, and large asteroids

Robert J. Stern, Taras Gerya, Paul J. Tackley

PII: S1674-9871(17)30113-5

DOI: [10.1016/j.gsf.2017.06.004](https://doi.org/10.1016/j.gsf.2017.06.004)

Reference: GSF 579

To appear in: *Geoscience Frontiers*

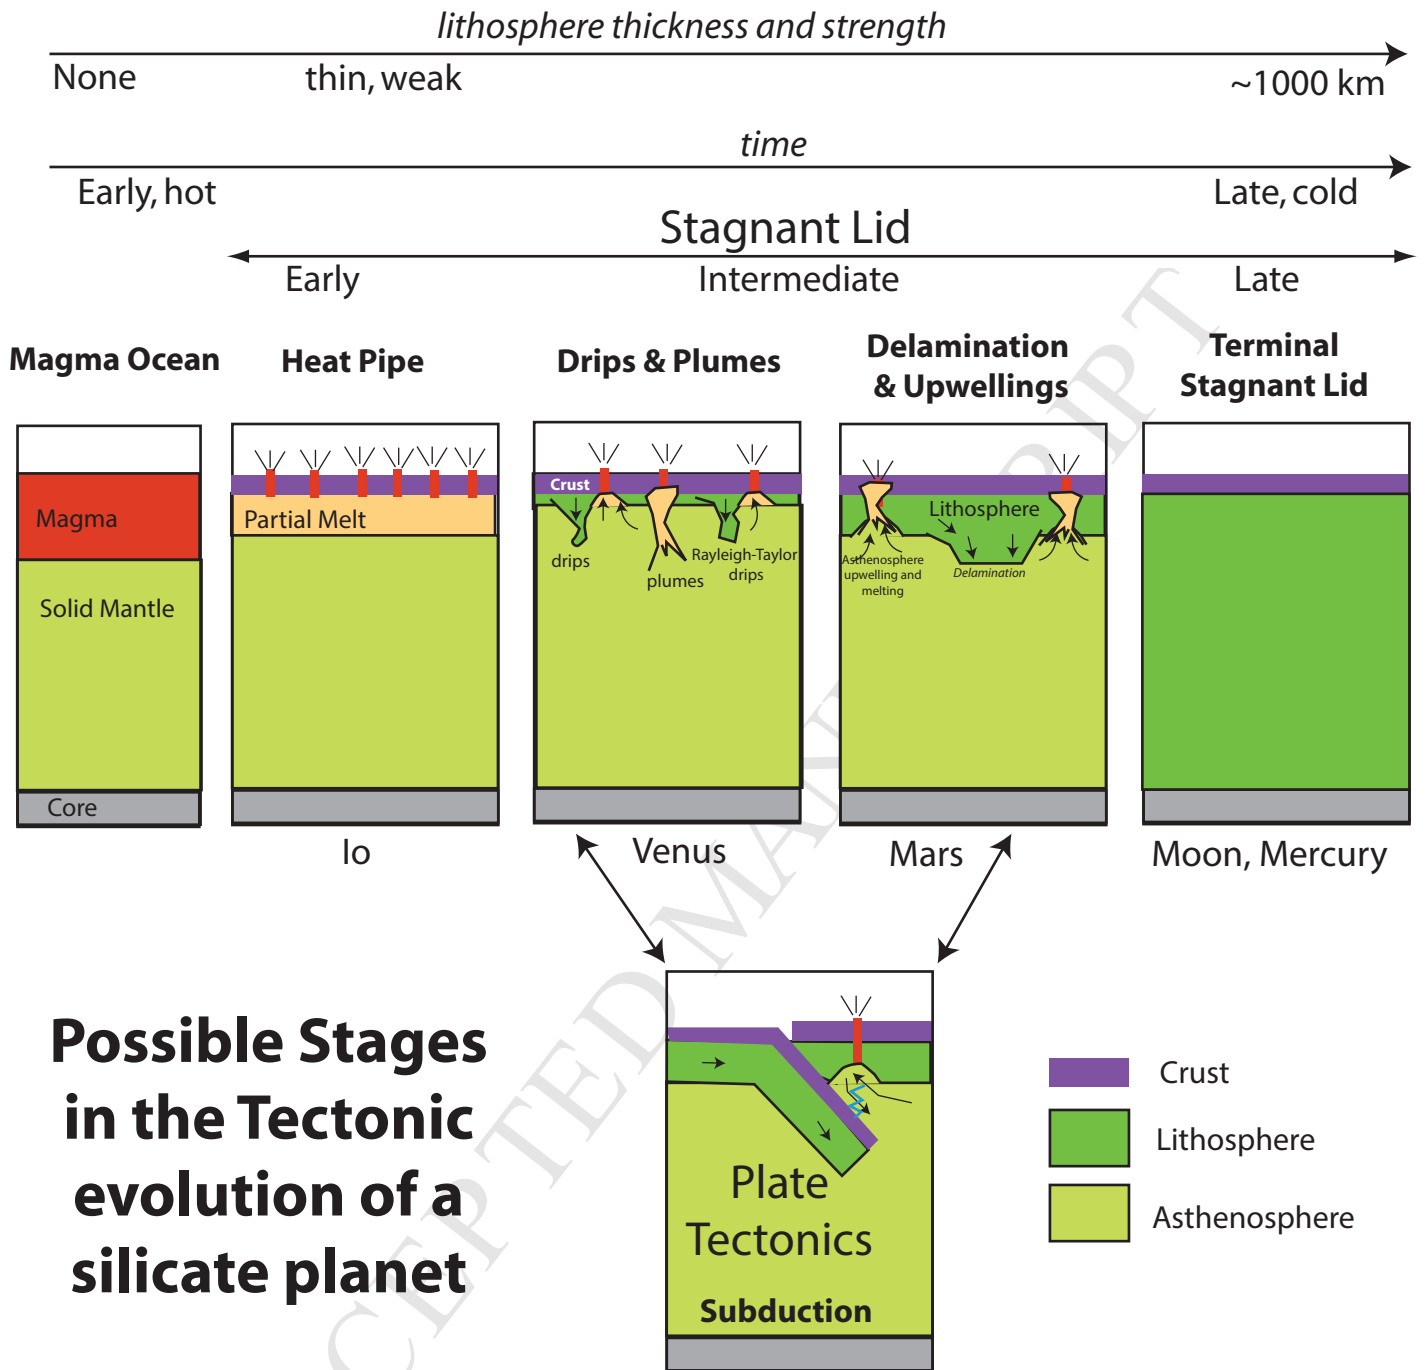

Received Date: 7 November 2016

Revised Date: 22 May 2017

Accepted Date: 16 June 2017

Please cite this article as: Stern, R.J., Gerya, T., Tackley, P.J., Stagnant lid tectonics: Perspectives from silicate planets, dwarf planets, large moons, and large asteroids, *Geoscience Frontiers* (2017), doi: 10.1016/j.gsf.2017.06.004.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Five Possible Stages in the Tectonic evolution of a silicate planet
