

Accepted Manuscript

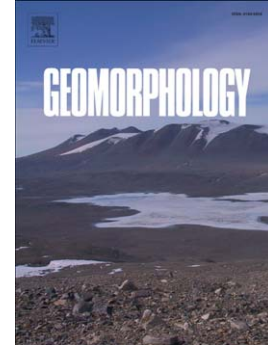

Regolith properties under trees and the biomechanical effects caused by tree root systems as recognized by electrical resistivity tomography (ERT)

Łukasz Pawlik, Marek Kasprzak

PII: S0169-555X(17)30417-8
DOI: doi:[10.1016/j.geomorph.2017.10.002](https://doi.org/10.1016/j.geomorph.2017.10.002)
Reference: GEOMOR 6188

To appear in: *Geomorphology*

Received date: 13 March 2017
Revised date: 4 June 2017
Accepted date: 1 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Regolith properties under trees and the biomechanical effects caused by tree root systems as recognized by Electrical Resistivity Tomography (ERT)
