Petrology and geochemistry of the Tasse mantle xenoliths of the Canadian Cordillera: A record of Archean to Quaternary mantle growth, metasomatism, removal, and melting

Ali Polat, Robert Frei, Fred J. Longstaffe, Derek J. Thorkelson, Eyal Friedman

PII: S0040-1951(18)30157-4
DOI: doi:[10.1016/j.tecto.2018.04.014](https://doi.org/10.1016/j.tecto.2018.04.014)
Reference: TECTO 127826
To appear in: *Tectonophysics*
Received date: 2 December 2017
Revised date: 12 April 2018
Accepted date: 21 April 2018

Please cite this article as: Ali Polat, Robert Frei, Fred J. Longstaffe, Derek J. Thorkelson, Eyal Friedman, Petrology and geochemistry of the Tasse mantle xenoliths of the Canadian Cordillera: A record of Archean to Quaternary mantle growth, metasomatism, removal, and melting. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
