

## Accepted Manuscript

Seismic evidence for the absence of deeply subducted continental slabs in the lower lithosphere beneath the central orogenic belt of China

Chuansong He, Yong-Fei Zheng

PII: S0040-1951(17)30521-8  
DOI: <https://doi.org/10.1016/j.tecto.2017.12.018>  
Reference: TECTO 127725  
To appear in: *Tectonophysics*  
Received date: 26 April 2017  
Revised date: 9 December 2017  
Accepted date: 21 December 2017

Please cite this article as: Chuansong He, Yong-Fei Zheng , Seismic evidence for the absence of deeply subducted continental slabs in the lower lithosphere beneath the central orogenic belt of China. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Tecto(2017), <https://doi.org/10.1016/j.tecto.2017.12.018>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
