Ancient fluid flow recorded by remarkably long, buried pockmark trains observed in 3D seismic data, Exmouth Plateau, Northern Carnarvon Basin

Tayallen Velayatham, Simon P. Holford, Mark A. Bunch

PII: S0264-8172(18)30204-6

DOI: [10.1016/j.marpetgeo.2018.05.007](https://doi.org/10.1016/j.marpetgeo.2018.05.007)

Reference: JMPG 3337

To appear in: *Marine and Petroleum Geology*

Received Date: 20 November 2017

Revised Date: 18 April 2018

Accepted Date: 7 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Ancient fluid flow recorded by remarkably long, buried pockmark trains
observed in 3D seismic data, Exmouth Plateau, Northern Carnarvon Basin**
