

Accepted Manuscript

Influences of thermal and fluid characteristics of methane and hydrothermal seeps on the stable oxygen isotopes of living benthic foraminifera

Ashley M. Burkett, Anthony E. Rathburn, Maria E. Pérez, Jonathan B. Martin

PII: S0264-8172(18)30083-7

DOI: [10.1016/j.marpetgeo.2018.02.037](https://doi.org/10.1016/j.marpetgeo.2018.02.037)

Reference: JMPG 3265

To appear in: *Marine and Petroleum Geology*

Received Date: 21 August 2017

Revised Date: 24 February 2018

Accepted Date: 27 February 2018

Please cite this article as: Burkett, A.M., Rathburn, A.E., Pérez, M.E., Martin, J.B., Influences of thermal and fluid characteristics of methane and hydrothermal seeps on the stable oxygen isotopes of living benthic foraminifera, *Marine and Petroleum Geology* (2018), doi: 10.1016/j.marpetgeo.2018.02.037.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Influences of thermal and fluid characteristics of methane and hydrothermal seeps on the stable oxygen isotopes of living benthic foraminifera
