Structural implications of strain localization towards a continental transform fault:  
The example of the shift between the Levant margin and the Dead Sea Fault plate  
boundary

Guy Lang, Michael Lazar, Uri Schattner

PII: S0264-8172(17)30394-X

DOI: [10.1016/j.marpetgeo.2017.10.009](https://doi.org/10.1016/j.marpetgeo.2017.10.009)

Reference: JMPG 3102

To appear in: *Marine and Petroleum Geology*

Received Date: 22 February 2017

Revised Date: 6 October 2017

Accepted Date: 9 October 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Structural implications of strain localization towards a continental transform fault: The example of the shift between the Levant margin and the Dead Sea Fault plate boundary**

**Authors:**

Guy Lang\*

Michael Lazar

Uri Schattner

Dr. Mosses Strauss Department of Marine Geosciences, Charney School of Marine Sciences,  
University of Haifa, Israel

\*Corresponding author

**Keywords:**

Seismic stratigraphy

Continental margin record

Strain localization

Transform plate boundary

Levant continental margin

Dead Sea fault
