Stable isotope and geochronological study of the Mawchi Sn-W deposit, Myanmar: Implications for timing of mineralization and ore genesis

Aung Zaw Myint, Kotaro Yonezu, Adrian J. Boyce, David Selby, Anders Scherstén, Thomas Tindell, Koichiro Watanabe, Ye Myint Swe

PII: S0169-1368(17)30953-8

DOI: <https://doi.org/10.1016/j.oregeorev.2018.03.014>

Reference: OREGEO 2530

To appear in: *Ore Geology Reviews*

Received Date: 7 December 2017

Revised Date: 13 March 2018

Accepted Date: 15 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
