A laser ablation inductively coupled plasma mass spectrometry study of the distribution of chalcophile elements among sulfide phases in sedimentary and magmatic rocks of the Duluth Complex, Minnesota, USA

N. Samalens, S.-J. Barnes, E.W. Sawyer

PII: S0169-1368(16)30800-9

DOI: <http://dx.doi.org/10.1016/j.oregeorev.2017.06.007>

Reference: OREGEO 2244

To appear in: *Ore Geology Reviews*

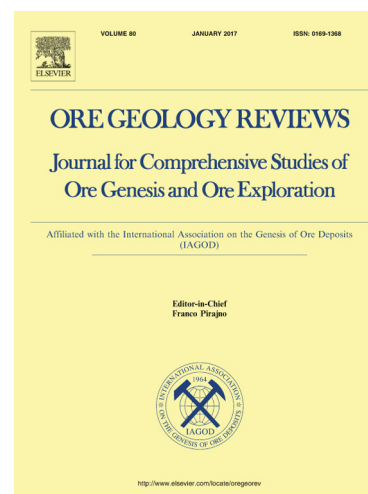

Received Date: 5 December 2016

Revised Date: 27 May 2017

Accepted Date: 6 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A laser ablation inductively coupled plasma mass spectrometry
study of the distribution of chalcophile elements among sulfide
phases in sedimentary and magmatic rocks of the Duluth Complex,
Minnesota, USA.**
