Hypoxia in the Holocene Baltic Sea: Comparing modern versus past intervals using sedimentary trace metals

Niels A.G.M. van Helmond, Tom Jilbert, Caroline P. Slomp

PII: S0009-2541(18)30330-9
DOI: [doi:10.1016/j.chemgeo.2018.06.028](https://doi.org/10.1016/j.chemgeo.2018.06.028)
Reference: CHEMGE 18827
To appear in: *Chemical Geology*
Received date: 13 April 2018
Revised date: 25 June 2018
Accepted date: 29 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Hypoxia in the Holocene Baltic Sea: comparing modern versus past intervals
using sedimentary trace metals**

Niels A.G.M. van Helmond^{a*}, Tom Jilbert^{a,b} and Caroline P. Slomp^a
