This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The influence of seawater carbonate chemistry, mineralogy, and diagenesis on calcium isotope variations in Lower-Middle Triassic carbonate rocks

Kimberly V. Lau^{a,1}, Kate Maher^a, Shaun T. Brown^{b,c}, Adam B. Jost^{a,d}, Demir Altiner^e, Donald J. DePaolo^{b,c}, Anton Eisenhauer^f, Brian M. Kelley^{a,g}, Daniel J. Lehrmann^h, Adina Paytanⁱ, Juan Carlos Silva-Tamayo^{a,j}, Meiyi Yu^k, and Jonathan L. Payne^a
