This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Calcium and strontium isotope systematics in the lagoon-estuarine environments of South Australia: Implications for water source mixing, carbonate fluxes and fish migration

Yuexiao Shao^{1*}, Juraj Farkaš^{1,2}, Chris Holmden³, Luke Mosley⁴, Isaac Kell-Duivesteyn^{1,5}, Christopher Izzo^{4#}, Patrick Reis-Santos^{4,6}, Jonathan Tyler¹, Philip Toerber^{2,1}, Jiří Frýda², Holly Taylor⁷, Deborah Haynes¹, John Tibby⁸, and Bronwyn M. Gillanders⁴
