Contrasting Mg isotopic compositions between Fe-Mn nodules and surrounding soils: Accumulation of light Mg isotopes by Mg-depleted clay minerals and Fe oxides

Ting Gao, Shan Ke, Shui-Jiong Wang, Fangbai Li, Chengshuai Liu, Jing Lei, Changzhong Liao, Fei Wu

PII: S0016-7037(18)30343-0
DOI: <https://doi.org/10.1016/j.gca.2018.06.028>
Reference: GCA 10817

To appear in: *Geochimica et Cosmochimica Acta*

Received Date: 25 September 2017
Revised Date: 17 April 2018
Accepted Date: 22 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Contrasting Mg isotopic compositions between Fe-Mn nodules and surrounding soils: Accumulation of light Mg isotopes by Mg-depleted clay minerals and Fe oxides
