This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The precipitation of gypsum, celestine, and barite and coprecipitation of radium during seawater evaporation

Yoav Oved Rosenberg^{*}, Ziv Sade and Jiwchar Ganor

Department of Geological and Environmental Sciences, Ben-Gurion University of the Negev, P.O.B 653, Beer Sheva 84105, Israel.

(*corresponding author: Yoav O. Rosenberg, E-mail: yoavoved@post.bgu.ac.il)

Key words: seawater, radium, gypsum, celestine, barite, co-precipitation, evaporite system, brine, ionic strength, kinetic effect.

Submitted to *Geochimica et Cosmochimica Acta*

April 24, 2018
