The retention of dust in protoplanetary disks: Evidence from agglomeratic olivine chondrules from the outer Solar System

Devin L. Schrader, Kazuhide Nagashima, Scott R. Waitukaitis, Jemma Davidson, Timothy J. McCoy, Harold C. Connolly Jr., Dante S. Lauretta

PII: S0016-7037(17)30788-3
DOI: <https://doi.org/10.1016/j.gca.2017.12.014>
Reference: GCA 10587

To appear in: *Geochimica et Cosmochimica Acta*

Received Date: 21 July 2017
Accepted Date: 14 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The retention of dust in protoplanetary disks: Evidence from agglomeratic olivine chondrules from the outer Solar System
