

## Accepted Manuscript

Paraná flood basalt volcanism primarily limited to ~1Myr beginning at 135Ma: New  $^{40}\text{Ar}/^{39}\text{Ar}$  ages for rocks from Rio Grande do Sul, and critical evaluation of published radiometric data

Ajoy K. Baksi

PII: S0377-0273(17)30123-3

DOI: doi: [10.1016/j.jvolgeores.2017.02.016](https://doi.org/10.1016/j.jvolgeores.2017.02.016)

Reference: VOLGEO 6019

To appear in: *Journal of Volcanology and Geothermal Research*

Received date: 31 July 2016

Revised date: 18 February 2017

Accepted date: 21 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Paraná flood basalt volcanism primarily limited to ~ 1 Myr beginning at 135 Ma;  
new  $^{40}\text{Ar}/^{39}\text{Ar}$  ages for rocks from Rio Grande do Sul, and critical evaluation of  
published radiometric data.**
