An AMS study of different silicic units from the southern Paraná-Etendeka Magmatic Province in Brazil: Implications for the identification of flow directions and local sources

L.F. Guimarães, M.I.B. Raposo, V.A. Janasi, E. Cañón-Tapia, L.A. Polo

PII: S0377-0273(17)30680-7
DOI: doi:[10.1016/j.jvolgeores.2017.11.014](https://doi.org/10.1016/j.jvolgeores.2017.11.014)
Reference: VOLGEO 6241

To appear in: *Journal of Volcanology and Geothermal Research*

Received date: 12 August 2016
Revised date: 11 November 2017
Accepted date: 14 November 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

An AMS study of different silicic units from the southern Paraná-Etendeka Magmatic Province in Brazil: implications for the identification of flow directions and local sources

Guimarães, L.F.^{1*}; Raposo, M.I.B.¹; Janasi, V.A.¹; Cañón-Tapia, E.²; Polo, L.A.¹
