Tin in granitic melts: The role of melting temperature and protolith composition

Mathias Wolf, Rolf L. Romer, Leander Franz, Francisco Javier López-Moro

PII: S0024-4937(18)30124-5
DOI: doi:[10.1016/j.lithos.2018.04.004](https://doi.org/10.1016/j.lithos.2018.04.004)
Reference: LITHOS 4619

To appear in:

Received date: 23 October 2017
Accepted date: 5 April 2018

Please cite this article as: Mathias Wolf, Rolf L. Romer, Leander Franz, Francisco Javier López-Moro , Tin in granitic melts: The role of melting temperature and protolith composition. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Tin in granitic melts:
The role of melting temperature and protolith composition**
