Garnet pyroxenite from Nilgiri Block, southern India: vestiges of a Neoarchean volcanic arc

Vinod O. Samuel, Sanghoon Kwon, M. Santosh, K. Sajeew

PII: S0024-4937(18)30130-0
DOI: doi:[10.1016/j.lithos.2018.04.009](https://doi.org/10.1016/j.lithos.2018.04.009)
Reference: LITHOS 4625

To appear in:

Received date: 24 November 2017
Accepted date: 12 April 2018

Please cite this article as: Vinod O. Samuel, Sanghoon Kwon, M. Santosh, K. Sajeew , Garnet pyroxenite from Nilgiri Block, southern India: vestiges of a Neoarchean volcanic arc. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Lithos(2018), doi:[10.1016/j.lithos.2018.04.009](https://doi.org/10.1016/j.lithos.2018.04.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Garnet pyroxenite from Nilgiri Block, southern India: vestiges of a Neoproterozoic volcanic arc

Vinod O. Samuel^{a,*}, Sanghoon Kwon^a, M. Santosh^{b,c}, K. Sajeed^d

Research Highlights

- Late Neoproterozoic convergent margin magmatism and earliest Paleoproterozoic metamorphism
- Evidence for high pressure and ultrahigh-temperature metamorphism
- Subduction and arc-continent collision during the Neoproterozoic-Paleoproterozoic transition
