Experimental constraints on metasomatism of mantle wedge peridotites by hybridized adakitic melts

Alexandre Corgne, Manuel E. Schilling, Michel Grégoire, Jessica Langlade

PII: S0024-4937(18)30093-8
DOI: doi:[10.1016/j.lithos.2018.03.006](https://doi.org/10.1016/j.lithos.2018.03.006)
Reference: LITHOS 4596

To appear in:

Received date: 20 December 2017
Accepted date: 6 March 2018

The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Lithos(2018), doi:[10.1016/j.lithos.2018.03.006](https://doi.org/10.1016/j.lithos.2018.03.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental constraints on metasomatism of mantle wedge peridotites by hybridized adakitic melts
