

## Accepted Manuscript

Age and geochemistry of the Charlestown Group, Ireland: Implications for the Grampian orogeny, its mineral potential and the Ordovician timescale

Richard J. Herrington, Steven P. Hollis, Mark R. Cooper, Iain Stobbs, Simon Tapster, Adrian Rushton, Brian McConnell, Teresa Jeffries

PII: S0024-4937(17)30447-4

DOI: <https://doi.org/10.1016/j.lithos.2017.12.012>

Reference: LITHOS 4511

To appear in:

Received date: 20 March 2017

Accepted date: 18 December 2017

Please cite this article as: Richard J. Herrington, Steven P. Hollis, Mark R. Cooper, Iain Stobbs, Simon Tapster, Adrian Rushton, Brian McConnell, Teresa Jeffries , Age and geochemistry of the Charlestown Group, Ireland: Implications for the Grampian orogeny, its mineral potential and the Ordovician timescale. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Lithos(2017), <https://doi.org/10.1016/j.lithos.2017.12.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Age and geochemistry of the Charlestown Group, Ireland:  
implications for the Grampian orogeny, its mineral potential and the  
Ordovician timescale
