Constraints from geochemistry and oxygen isotopes for the hydrothermal origin of orthoamphibole mafic gneiss in the New Jersey Highlands, north-central Appalachians, USA

Richard A. Volkert, William H. Peck

PII: S0024-4937(17)30354-7
DOI: doi:[10.1016/j.lithos.2017.10.011](https://doi.org/10.1016/j.lithos.2017.10.011)
Reference: LITHOS 4448

To appear in:

Received date: 27 May 2017
Accepted date: 11 October 2017

Please cite this article as: Richard A. Volkert, William H. Peck , Constraints from geochemistry and oxygen isotopes for the hydrothermal origin of orthoamphibole mafic gneiss in the New Jersey Highlands, north-central Appalachians, USA. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Lithos(2017), doi:[10.1016/j.lithos.2017.10.011](https://doi.org/10.1016/j.lithos.2017.10.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Constraints from geochemistry and oxygen isotopes for the hydrothermal origin of orthoamphibole mafic gneiss in the New Jersey Highlands, north-central Appalachians, USA

Richard A. Volkert^{1,2} and William H. Peck³
