Identifying chronostratigraphic breaks in aeolian sediment profiles using near-surface luminescence dating and changepoint analysis

Catherine E. Buckland, Richard M. Bailey, David S.G. Thomas

PII: S1871-1014(17)30186-3

DOI: [10.1016/j.quageo.2018.03.011](https://doi.org/10.1016/j.quageo.2018.03.011)

Reference: QUAGEO 909

To appear in: *Quaternary Geochronology*

Received Date: 27 November 2017

Revised Date: 22 March 2018

Accepted Date: 22 March 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Identifying chronostratigraphic breaks in aeolian sediment**
2 **profiles using near-surface luminescence dating and**
3 **change point analysis.**
