

Accepted Manuscript

Early to Mid-Miocene syn-extensional massive silicic volcanism in the Pannonian Basin (East-Central Europe): Eruption chronology, correlation potential and geodynamic implications

Réka Lukács, Szabolcs Harangi, Marcel Guillong, Olivier Bachmann, László Fodor, Yannick Buret, István Dunkl, Jakub Sliwinski, Albrecht von Quadt, Irena Peytcheva, Matthew Zimmerer

PII: S0012-8252(17)30340-9
DOI: <https://doi.org/10.1016/j.earscirev.2018.02.005>
Reference: EARTH 2583
To appear in: *Earth-Science Reviews*
Received date: 29 June 2017
Revised date: 29 January 2018
Accepted date: 5 February 2018

Please cite this article as: Réka Lukács, Szabolcs Harangi, Marcel Guillong, Olivier Bachmann, László Fodor, Yannick Buret, István Dunkl, Jakub Sliwinski, Albrecht von Quadt, Irena Peytcheva, Matthew Zimmerer, Early to Mid-Miocene syn-extensional massive silicic volcanism in the Pannonian Basin (East-Central Europe): Eruption chronology, correlation potential and geodynamic implications. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Early to Mid-Miocene syn-extensional massive silicic volcanism in the Pannonian Basin (East-Central Europe): eruption chronology, correlation potential and geodynamic implications
