

## Accepted Manuscript

A candidate methane-clathrate destabilisation event on Mars: A model for sub-millennial-scale climatic change on Earth

David P. Page

PII: S1342-937X(18)30079-0  
DOI: doi:[10.1016/j.gr.2018.03.010](https://doi.org/10.1016/j.gr.2018.03.010)  
Reference: GR 1944

To appear in:

Received date: 23 October 2017  
Revised date: 3 March 2018  
Accepted date: 20 March 2018

Please cite this article as: David P. Page , A candidate methane-clathrate destabilisation event on Mars: A model for sub-millennial-scale climatic change on Earth. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Gr(2018), doi:[10.1016/j.gr.2018.03.010](https://doi.org/10.1016/j.gr.2018.03.010)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**A candidate methane-clathrate destabilisation event on Mars: a model for sub-millennial-scale climatic change on Earth**
