

## Accepted Manuscript

Petrogenesis of the NE Gondwanan uppermost Ediacaran-Lower Cretaceous siliciclastic sequence of Jordan: provenance, tectonic, and climatic implications

Belal S. Amireh

PII: S1367-9120(17)30709-5  
DOI: <https://doi.org/10.1016/j.jseaes.2017.12.037>  
Reference: JAES 3369

To appear in: *Journal of Asian Earth Sciences*

Received Date: 2 July 2017  
Revised Date: 25 December 2017  
Accepted Date: 27 December 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
