Discrete element modeling of extensional fault-related monocline formation

Kevin J. Smart, David A. Ferrill

PII: S0191-8141(18)30381-X

DOI: [10.1016/j.jsg.2018.07.009](https://doi.org/10.1016/j.jsg.2018.07.009)

Reference: SG 3704

To appear in: *Journal of Structural Geology*

Received Date: 15 December 2017

Revised Date: 3 July 2018

Accepted Date: 17 July 2018

Please cite this article as: Smart, K.J., Ferrill, D.A., Discrete element modeling of extensional fault-related monocline formation, *Journal of Structural Geology* (2018), doi: 10.1016/j.jsg.2018.07.009.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Discrete element modeling of extensional fault-related monocline formation**
