Low signal-to-noise FDEM in-phase data: Practical potential for magnetic susceptibility modelling

Samuël Delefortrie, Daan Hanssens, Philippe De Smedt

PII: S0926-9851(17)30555-4
DOI: doi:[10.1016/j.jappgeo.2018.03.003](https://doi.org/10.1016/j.jappgeo.2018.03.003)
Reference: APPGEO 3461

To appear in:

Received date: 6 June 2017
Revised date: 29 January 2018
Accepted date: 4 March 2018

Please cite this article as: Samuël Delefortrie, Daan Hanssens, Philippe De Smedt , Low signal-to-noise FDEM in-phase data: Practical potential for magnetic susceptibility modelling. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Appgeo(2017), doi:[10.1016/j.jappgeo.2018.03.003](https://doi.org/10.1016/j.jappgeo.2018.03.003)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Low signal-to-noise FDEM in-phase data: practical potential for magnetic susceptibility modelling
