This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Locating scatterers while drilling using seismic noise due to Tunnel Boring Machine

Highlights

Seismic-interferometry-inspired method is applied to noise records.

We simulate noise-source wave propagation in a medium where scatterers are present.

We use Tunnel Boring Machine (TBM) seismic noise recorded at the surface.

We estimate the location of scatterers ahead of a tunnel wall while drilling.

Keywords

Seismic-noise correlation, tunnel seismic-while-drilling, body waves, travelttime inversion, locating scatterers, finite-difference modeling,
