

Accepted Manuscript

Estimating water volume stored in the south-eastern Greenland firm aquifer using magnetic-resonance soundings

Anatoly Legchenko, Clément Miège, Lora S. Koenig, Richard R. Forster, Olivia Miller, D. Kip Solomon, Nicholas Schmerr, Lynn Montgomery, Stefan Ligtenberg, Ludovic Brucker

PII: S0926-9851(17)30892-3
DOI: doi:[10.1016/j.jappgeo.2018.01.005](https://doi.org/10.1016/j.jappgeo.2018.01.005)
Reference: APPGEO 3404

To appear in: *Journal of Applied Geophysics*

Received date: 30 September 2017
Revised date: 8 January 2018
Accepted date: 9 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Estimating water volume stored in the south-eastern Greenland firn aquifer using
magnetic-resonance soundings**
