Improving the structure and mechanical properties of loess by acid solutions – An experimental study

Yao Zhang, Zaiqiang Hu, Lei Li, Zhijia Xue

PII: S0013-7952(18)30011-5
DOI: doi:[10.1016/j.enggeo.2018.07.023](https://doi.org/10.1016/j.enggeo.2018.07.023)
Reference: ENGEO 4902
To appear in: *Engineering Geology*
Received date: 4 January 2018
Revised date: 20 July 2018
Accepted date: 30 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Improving the structure and mechanical properties of loess
by acid solutions – An experimental study**
