Using peak ground velocity to characterize the response of soil-pile system in liquefying ground

Xiaoyu Zhang, Liang Tang, Xianzhang Ling, Andrew Hin Cheong Chan, Lu Jinchi

PII: S0013-7952(17)30539-2
DOI: doi:[10.1016/j.enggeo.2018.04.011](https://doi.org/10.1016/j.enggeo.2018.04.011)
Reference: ENGEO 4822
To appear in: *Engineering Geology*
Received date: 3 April 2017
Revised date: 7 April 2018
Accepted date: 15 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Using Peak Ground Velocity to Characterize the Response of Soil-Pile System in Liquefying Ground

Xiaoyu ZHANG ^a, Liang TANG ^{b*}, Xianzhang LING ^c, Andrew Hin Cheong CHAN ^d, and Jinchi LU ^e
