Experimental study of the hydro-mechanical response of Opalinus Clay – Part 2: Influence of the stress path on the pore pressure response

Katrin M. Wild, Florian Amann

PII: S0013-7952(17)30577-X
DOI: doi:[10.1016/j.enggeo.2018.02.011](https://doi.org/10.1016/j.enggeo.2018.02.011)
Reference: ENGEO 4769
To appear in: *Engineering Geology*
Received date: 11 April 2017
Revised date: 5 January 2018
Accepted date: 14 February 2018

Please check if appropriate. *Enggeo*(2018), doi:[10.1016/j.enggeo.2018.02.011](https://doi.org/10.1016/j.enggeo.2018.02.011)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
