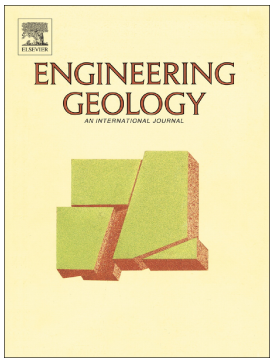
Accepted Manuscript



Discontinuity modelling and rock block geometry identification to optimize production in dimension stone quarries

Reza Yarahmadi, Raheb Bagherpour, Sayed-Ghahreman Taherian, Luís M.O. Sousa

PII: S0013-7952(17)30423-4
DOI: doi:10.1016/j.enggeo.2017.11.006
Reference: ENGEO 4693

To appear in: *Engineering Geology*

Received date: 16 March 2017
Revised date: 12 October 2017
Accepted date: 7 November 2017

Sousa , Discontinuity modelling and rock block geometry identification to optimize production in dimension stone quarries. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. Engeo(2017), doi:10.1016/j.enggeo.2017.11.006

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
