Evaluation of a Multiplex Liquid Chromatography-Tandem Mass Spectrometry Method for Congenital Adrenal Hyperplasia in Pediatric Patients

Jing Cao, Marilyn Sonilal, Stephen M. Roper, Mahesheema Ali, Sridevi Devaraj

PII: S2376-9998(18)30013-8
DOI: <https://doi.org/10.1016/j.clinms.2018.07.001>
Reference: CLINMS 38

To appear in: *Clinical Mass Spectrometry*

Received Date: 21 March 2018
Revised Date: 22 June 2018
Accepted Date: 23 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Evaluation of a Multiplex Liquid Chromatography-Tandem Mass Spectrometry Method for Congenital Adrenal Hyperplasia in Pediatric Patients
