Determination of nucleosidic/tidic reverse transcriptase inhibitors in plasma and cerebrospinal fluid by ultra-high-pressure liquid chromatography coupled with tandem mass spectrometry

Perrine Courlet, Dany Spaggiari, Matthias Cavassini, Renaud Du Pasquier, Saldanha Susana Alves, Thierry Buclin, Catia Marzolini, Chantal Csajka, Laurent Decosterd

PII: S2376-9998(18)30005-9
DOI: <https://doi.org/10.1016/j.clinms.2018.04.001>
Reference: CLINMS 35

To appear in: *Clinical Mass Spectrometry*

Received Date: 22 January 2018
Revised Date: 18 April 2018
Accepted Date: 24 April 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
