The use of microfabrication technology to address the challenges of building physiologically relevant vasculature

A.Dawn Bannerman, Rick Xing Ze Lu, Anastasia Korolj, Lucie H. Kim, Milica Radisic

PII: S2468-4511(17)30087-9

DOI: [10.1016/j.cobme.2017.12.003](https://doi.org/10.1016/j.cobme.2017.12.003)

Reference: COBME 66

To appear in: *Current Opinion in Biomedical Engineering*

Received Date: 13 November 2017

Revised Date: 14 December 2017

Accepted Date: 19 December 2017

Please cite this article as: A.D. Bannerman, R.X. Ze Lu, A. Korolj, L.H. Kim, M. Radisic, The use of microfabrication technology to address the challenges of building physiologically relevant vasculature, *Current Opinion in Biomedical Engineering* (2018), doi: 10.1016/j.cobme.2017.12.003.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The use of microfabrication technology to address the challenges of building physiologically relevant vasculature
