Abstract

Objective To analyze practice habits associated with the use, reversal and monitoring of nondepolarizing neuromuscular blocking agents (NMBAs) in dogs by different groups of veterinarians.

Study design Online anonymous survey to veterinarians.

Population Data from 390 answered surveys.

Methods A questionnaire was sent to email list servers of the American College of Veterinary Anesthesia and Analgesia (ACVAA-list), Sociedad Española de Anestesia y Analgesia Veterinaria (SEEAV-list), Colégio Brasileiro de Anestesiologia Veterinária (CBAV-list), and
