Funding

This research was supported by a Postdoctoral Fellowship in Orthopaedic Manual Therapy at the School of Physiotherapy, University of Otago and held by Ewan Kennedy.

Conflict of interest

The authors declare that they have no conflict of interest.

Note that Mr Dusty Quinn was the study physiotherapist, which could be viewed as a potential conflict of interest. To minimise this the data extraction was performed by two independent assistants, the data was collated by the lead author (EK) and Mr Quinn's role as the study physiotherapist is clearly stated in the manuscript.

Acknowledgements

We would like to acknowledge the help of our two research assistants Divya Adhia and Adilia Nur Amirulhusni Alshukor in extracting the data, and the staff at Back in Motion Ltd for facilitating access to their systems.
