Does altered mandibular position and dental occlusion influence upper cervical movement: A cross-sectional study in asymptomatic people

Francis Grondin, PT, DO, Toby Hall, PT, PhD, MSc, Harry von Piekartz, PT, PhD, MSc

PII: S1356-689X(16)30638-5

DOI: [10.1016/j.math.2016.06.007](https://doi.org/10.1016/j.math.2016.06.007)

Reference: YMATH 1872

To appear in: *Manual Therapy*

Received Date: 19 July 2015

Revised Date: 25 May 2016

Accepted Date: 7 June 2016

Please cite this article as: Grondin F, Hall T, von Piekartz H, Does altered mandibular position and dental occlusion influence upper cervical movement: A cross-sectional study in asymptomatic people, *Manual Therapy* (2016), doi: 10.1016/j.math.2016.06.007.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Does altered mandibular position and dental occlusion influence upper cervical movement: A cross-sectional study in asymptomatic people.**
