Soil Properties Influence the Response of Terrestrial Plants to Metallic Nanoparticles Exposure

Christian O. Dimkpa

PII: S2468-5844(18)30024-2

DOI: [10.1016/j.coesh.2018.06.007](https://doi.org/10.1016/j.coesh.2018.06.007)

Reference: COESH 53

To appear in: *Current Opinion in Environmental Science & Health*

Received Date: 5 April 2018

Revised Date: 27 June 2018

Accepted Date: 29 June 2018

Please cite this article as: Dimkpa CO, Soil Properties Influence the Response of Terrestrial Plants to Metallic Nanoparticles Exposure, *Current Opinion in Environmental Science & Health* (2018), doi: 10.1016/j.coesh.2018.06.007.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Soil Properties Influence the Response of Terrestrial Plants to Metallic**  
2 **Nanoparticles Exposure**
