Title: Method for suppressing superheating behavior during microwave assisted nanoparticle formation by ethylene glycol addition

Authors: Yusuke Asakuma, Shungo Matsumura, Agus Saptoro

PII: S0255-2701(18)30537-3
DOI: <https://doi.org/10.1016/j.cep.2018.08.003>
Reference: CEP 7351

To appear in: *Chemical Engineering and Processing*

Received date: 7-5-2018

Accepted date: 5-8-2018

Please cite this article as: Asakuma Y, Matsumura S, Saptoro A, Method for suppressing superheating behavior during microwave assisted nanoparticle formation by ethylene glycol addition, *Chemical Engineering and Processing - Process Intensification* (2018), <https://doi.org/10.1016/j.cep.2018.08.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Method for suppressing superheating behavior during microwave assisted nanoparticle formation by ethylene glycol addition
