Rapid Phenotypic methods to improve the diagnosis of bacterial bloodstream infections: meeting the challenge to reduce the time to result

Grégory Dubourg, Brigitte Lamy, Raymond Ruimy

PII: S1198-743X(18)30293-3

DOI: [10.1016/j.cmi.2018.03.031](https://doi.org/10.1016/j.cmi.2018.03.031)

Reference: CMI 1262

To appear in: *Clinical Microbiology and Infection*

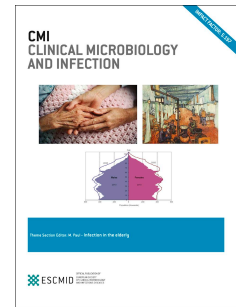

Received Date: 29 December 2017

Revised Date: 17 March 2018

Accepted Date: 20 March 2018

Please cite this article as: Dubourg G, Lamy B, Ruimy R, Rapid Phenotypic methods to improve the diagnosis of bacterial bloodstream infections: meeting the challenge to reduce the time to result, *Clinical Microbiology and Infection* (2018), doi: 10.1016/j.cmi.2018.03.031.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Rapid Phenotypic methods to improve the diagnosis of bacterial bloodstream infections:**
2 **meeting the challenge to reduce the time to result**
