Nonreciprocal phenomenon in nonlinear elastic wave metamaterials with continuous properties

Zhen-Ni Li , Yi-Ze Wang , Yue-Sheng Wang

PII: S0020-7683(18)30231-2
DOI: [10.1016/j.ijsolstr.2018.06.008](https://doi.org/10.1016/j.ijsolstr.2018.06.008)
Reference: SAS 10018

To appear in: *International Journal of Solids and Structures*

Received date: 26 December 2017
Revised date: 28 April 2018
Accepted date: 7 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Transfer matrices for both fundamental and double frequency waves are derived
- Stop band and transmission coefficient are expressed.
- Nonreciprocal phenomenon can be found in elastic wave metamaterials based on the nonlinearity.
