

## Accepted Manuscript

Temperature impact on sludge yield, settleability and kinetics of three heterotrophic conversions corroborates the prospect of thermophilic biological nitrogen removal

Tom G.L. Vandekerckhove, Chaïm De Mulder, Nico Boon, Siegfried E. Vlaeminck

PII: S0960-8524(18)31106-4  
DOI: <https://doi.org/10.1016/j.biortech.2018.08.012>  
Reference: BITE 20295

To appear in: *Bioresource Technology*

Received Date: 18 June 2018  
Revised Date: 1 August 2018  
Accepted Date: 3 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Temperature impact on sludge yield, settleability and kinetics of three heterotrophic conversions corroborates the prospect of thermophilic biological nitrogen removal**
