This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- UI affects the labor market through job search, but also via other channels.
- Search externalities reduce the effect of UI on unemployment.
- Take-up behavior of other social programs affects the costs of UI.
- Job separations (quits and layoffs) may respond to UI generosity.
