

## Accepted Manuscript

In situ surface-enhanced Raman spectroscopy study of thiocyanate ions adsorbed on silver nanoparticles under high pressure

Pan Wang, Heping Li, Can Cui, Jianjun Jiang

PII: S0301-0104(18)30499-3

DOI: <https://doi.org/10.1016/j.chemphys.2018.08.029>

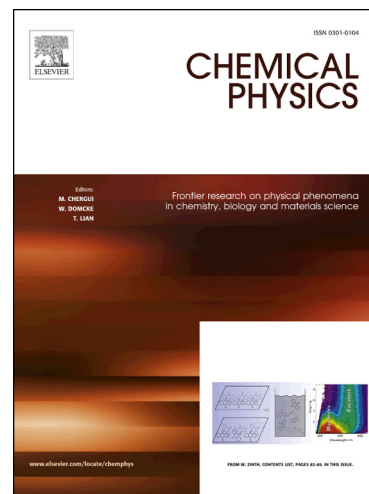

Reference: CHEMPH 10145

To appear in: *Chemical Physics*

Received Date: 10 May 2018

Revised Date: 4 July 2018

Accepted Date: 15 August 2018

Please cite this article as: P. Wang, H. Li, C. Cui, J. Jiang, In situ surface-enhanced Raman spectroscopy study of thiocyanate ions adsorbed on silver nanoparticles under high pressure, *Chemical Physics* (2018), doi: <https://doi.org/10.1016/j.chemphys.2018.08.029>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
