

## Accepted Manuscript

ANKRD9 is associated with tumor suppression as a substrate receptor subunit of ubiquitin ligase

Yejin Lee, Byungho Lim, Seon Woo Lee, Woo Rin Lee, Yong-In Kim, Minhyeok Kim, Hyungseok Ju, Mi Young Kim, Suk-Jo Kang, Ji-Joon Song, J. Eugene Lee, Changwon Kang

PII: S0925-4439(18)30229-1  
DOI: doi:[10.1016/j.bbadis.2018.07.001](https://doi.org/10.1016/j.bbadis.2018.07.001)  
Reference: BBADIS 65171  
To appear in: *BBA - Molecular Basis of Disease*  
Received date: 2 February 2018  
Revised date: 17 May 2018  
Accepted date: 2 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A revision of BBADIS-18-98 for a full-length research article in

*BBA Molecular Basis of Disease*

## **ANKRD9 is associated with tumor suppression as a substrate receptor subunit of ubiquitin ligase**
