Enhanced brain expression of genes related to cell proliferation and neural differentiation is associated with cortisol receptor expression in fishes

B. Sadoul, S. Alfonso, E. Bessa, A. Bouchareb, E. Blondeau-Bidet, P. Clair, B. Chatain, ML. Bégout, B. Geffroy

PII: S0016-6480(18)30234-X
DOI: <https://doi.org/10.1016/j.ygcen.2018.06.001>
Reference: YGCEN 12960

To appear in: *General and Comparative Endocrinology*

Received Date: 9 April 2018
Revised Date: 7 June 2018
Accepted Date: 10 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

1 **Enhanced brain expression of genes related to cell proliferation and neural**
2 **differentiation is associated with cortisol receptor expression in fishes**
