This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

TAVR CT Assessment of Membranous Septum

Computed tomography (CT) assessment of the membranous septal anatomy prior to transcatheter aortic valve replacement (TAVR) with the balloon-expandable SAPIEN 3 valve

Short Title: CT Assessment of Membranous Septum Prior to TAVR

Authors: Brett A. Oestreich, MD^a, Mackenzie Mbai, MD^{a,b}, Sergey Gurevich, MD^a, Prabhjot S Nijjar MD^a, Selcuk Adabag, MD, MS^{a,b}, Stefan Bertog, MD^{a,b}, Rosemary Kelly, MD^c, Santiago Garcia, MD^{a,b}
